Subject: Appreciation for the Development and Implementation of Technology-Based Therapy

Dear Mam

On behalf of Satya Special School, I extend our heartfelt appreciation for your pioneering work in developing and implementing technology-based therapy modules for children with disabilities.

Your contributions—spanning Occupational Therapy (including the waterfall environment, music therapy, and both low-cost Google Cardboard and advanced Quest VR for sensory and environmental immersion), Physiotherapy (focusing on fine and gross motor skills through gameplay), and Virtual Animal-Assisted Therapy—have been instrumental in enhancing the holistic development of our students.

First introduced in 2020 and piloted during student assessments, these therapies have now become an integral part of our curriculum. Over the past year, we have witnessed significant improvements in children's communication, attention span, motor coordination, and emotional regulation. Teachers and therapists have observed increased classroom engagement and reduced anxiety, while parents have shared touching stories of progress in daily living skills—clear indicators of the program's success.

The collaborative spirit with which your team worked alongside our educators and therapists ensured that the modules were continuously adapted to the specific needs of each child. Your openness to feedback and dedication to inclusivity have truly set a benchmark in the use of assistive technology in special education.

We are also proud to share that this initiative has drawn appreciation from eminent professionals such as Dr. Sunil Narayan, Senior Professor and Head, Department of Neurology, JIMER . With trained therapists in place, we are now exploring the establishment of a dedicated technology-based therapy center at Satya and aim to formally integrate these therapies into all school-based intervention plans.

Thank you once again for your vision, commitment, and unwavering support in empowering children with disabilities through technology. We look forward to deepening this impactful partnership in the years to come.

For Satya Special School
